<https://hunterkastner.github.io/Advanced-Portfolio/> - Personal Portfolio

A versatile software developer specializing in frontend development. Proficient in a broad range of technologies including React, TypeScript, Firebase and more. Passionate about building scalable, efficient and user-friendly applications. A dedicated and focused college student and a member of the US Army National Guard.

Professional Experience

Frontend Engineering Institute

Remote | July 2024 - Present

Frontend Developer

- Built 7 websites and numerous programs to execute various tasks, providing a good understanding of HTML, CSS, Javascript, Tailwind, React, NodeJs, NPM, and Yarn.
- Created a portfolio website (Link Above), showcasing my top projects and the tech stacks used for each.
- Developed Responsive React.js frontend components for NFT display platform utilizing Firebase Authentication and Firestore Database.
- Integrated RESTful API's using Axios to retrieve NFT metadata and digital assets.
- Built and maintained 15+ reusable React components.

Army National Guard

On-Site | November 2021 - Present

Avionic Mechanic

- Repaired multi-million dollar aircraft, showing the ability to identify a problem, research to come up with a solution, and fix any malfunction on the aircraft.
- Built and taught 3 different classes for new/beginner employees to understand our work and succeed.
- Designated as the Head of AMTP (Aircraft Maintenance and Training Program) for our unit, put in charge of every worker's files and training. Whenever assigned, reworked our old file keeping system to update it to a digital format and caught up on years worth of missing records and requirements, earning an Army Medal of Achievement for dedication to the success of our unit in this area.

Raising Cane's Chicken Fingers

On-Site | July 2023 - Present

Zone Manager

- Led a shift of 8-12 crew to a successful shift each work day. Kept up crew morale and motivation, promoted fun in the workplace, and maintained/enforced standards and procedures the whole time.
- Assigned as the leader of training for our restaurant, reviewed all training shifts and books to ensure that each new worker is getting everything they need to succeed and aren't being left behind.

Projects (personal)

Search API Project:

Created a fully functional search platform for movies

- Engineered & integrated a search api for (movies/anime/etc) with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase (movies/anime/etc) on an individual route. <https://movie-website-react-one.vercel.app/>

Slack Clone Project

Created a fully functional Slack Clone

- Created a slack clone to learn new techs, implemented the feature to login with google or github, a user authorization system, the ability to create, delete, rename, message, reply, and react in different channels. Users can be given the Admin role which lets them kick out users from workspaces and create channels in workspaces. Got great practice learning new tech stacks and researching how to implement them. <https://slack-clone-seven-delta.vercel.app/>

Technical Skills:

Programming Languages: TypeScript, JavaScript, HTML, CSS, C++, C#

Frameworks: React, TailwindCSS, Firebase, NextJS

Tools & Other platforms: Vercel, GitHub, ShadCN, Convex, Axios

Education:

Frontend Engineering Institute | Certificate

June 2024 - January 2025

Degrees: Cameron University, Computer Science - Expected Graduation in May 2028
